EDUCATION

University of Texas at Arlington

B.S., Computer Engineering.

Expected August 2028

Relevant Coursework: Algorithms & Data Structures, Object-Oriented Programming, Computer Organization & Assembly

Language

Programming, Digital Logic Design I, Discrete Structures, Intermediate Programming, Linear Algebra for CSE

PROJECTS

Network-Wide Ad-Blocking Server

Raspberry Pi

- Designed and deployed a Raspberry Pi running Pi-hole as a network-wide DNS filtering server to block advertisements and malicious domains.
- Configured the Raspberry Pi with a static IP address and deployed Pi-hole as the network's DHCP server to provide centralized DNS and IP address management.
- Administered a Linux-based server by performing software updates, monitoring system performance, and troubleshooting DNS and network connectivity issues.

Skincare Tracking Application

Java, Java Swing

- Developed a Java desktop application using Swing that enables users to create, organize, and manage personalized skincare routines.
- Applied object-oriented programming principles by designing custom classes to represent skincare products, routine steps, notes, and scheduling information.
- Implemented backend validation to prevent duplicate routine entries and ensure accurate user input.
- Implemented sorting logic to automatically arrange products according to their recommended application order, improving usability.

Calculator

SystemVerilog

- Designed and implemented a calculator in SystemVerilog capable of performing binary addition and subtraction.
- Implemented two's complement arithmetic for correct support of negative numbers and signed operations.
- Developed logic to convert binary outputs into decimal values for user-readable display.

SKILLS

Programming Languages: Java, C, SystemVerilog, Assembly

Networking: DNS, Pi-hole, DHCP, Raspberry Pi

Operating Systems: Linux, Windows **Hardware:** FPGA

Tools: GitHub, VS Code, Eclipse, Microsoft Office

ACTIVITIES & LEADERSHIP

Unity Islamic Center

Volunteer

- Set up equipment, organized materials, and event spaces before and during the community events.
- Guided attendees answered questions and helped people find appropriate locations at community events.
- Coordinated with staff to complete short-notice tasks efficiently and keep the event running smoothly.

Mission Arlington

Volunteer

- Sorted, cleaned, and organized donated items for community distribution.
- Maintained efficiency and cleanliness in a high-volume donation environment.
- Worked efficiently with other volunteers to complete tasks and keep the distribution process moving.
